1. User Research

Learn who your users are: interviews,
surveys, and behaviour analytics to define real
problems.

2. Information Architecture

Structure content so users find what they need
— sitemaps, flows, labeling and navigation.

UI/UX Designer & Graphic Designer

3. Interaction Design

Define behaviours: micro-interactions, states, and flows that make tasks simple and clear.

UI/UX Designer & Graphic Designer

4. Visual Design

Craft the look and feel — typography, color, imagery — to communicate brand and hierarchy.

5. Prototyping & Testing

Turn ideas into clickable prototypes, validate with users, iterate based on real feedback.

6. Accessibility & Performance

Design for everyone: contrast, keyboard navigation, load time — inclusive and fast experiences.
